

Concordance: 2019 Version to 2025 Version

This concordance has been prepared to help people transitioning from the 2019 versions of each module to the revised 2025 version. This table is in the order of the 2019 modules.

The key to the meaning of the colour coding is set out below:

Colour	Meaning
Purple	The heading or question is entirely new and did not appear in the 2019 version.
Grey	The question was in the 2019 version and had a related data table. In the 2025 version, while the data table from the 2019 version may still be there, the 2025 presents multiple alternative methods for providing the relevant information.
Blue	There are changes to the question or answer choices presented in 2019, but those changes are considered not to be particularly substantive. In some cases, the change may simply to be to include a follow on question directly as one of the answer choices rather than presenting it as its own question in a separate row. Care should be taken to make sure the appropriate answer from the 2019 DDQ is ported into the 2025 version in the correct place.
Orange	Material substantive changes were made to the question or to the answer options presented which will necessitate a re-think of the response provided to assure it is still responsive to the question now being asked.
Green	No change
Red	The 2019 question was deleted and does not have a counterpart in the 2025 version as a result.

Short form questions from each module are indicated in **bold face**. Please note that there are several questions in the 2025 short form manager module that do not have a single direct corresponding question in the long form modules. This was done to facilitate clearer presentation in the short form format.

2019 Version (<i>most recent</i>)	2025 Version
Overview Module (Module 1) ("OVR")	
New	Overview statement
